JOB DESCRIPTION
React Native Guru / Senior Mobile Application Developer

Introduction

We are seeking an exceptionally skilled and highly experienced React Native Guru to join our tech team. We have partnered with one of the most prestigious brands in the world in a new venture together: As a pre-seed food-tech company based in Madrid, we will operate worldwide, with a fast-growth mindset that is creating the best team possible!

Our vision is to create a new platform that brings taste lovers closer together, enables them to experience new ways of enjoying cooking and drinking, interacting with chefs, bartenders and sommeliers from every category, learning from them and accessing high quality content.

Our mission is to create the gold standard of content and transactional platforms for food and drinks lovers, that not only engages the consumers deeply into its content, but allows innovative ways of interaction between them, experts and producers.

We have five main values, which are the pillars of our venture: Trust, Integrity, Freedom, Curiosity and Passion. If you identify yourself with them, please keep reading!

Brief Description

As a React Native Guru, your realm will be the forefront of mobile application development. With your profound expertise, you will take the helm in developing, refining, and advancing our MasterChefWorld app (https://www.masterchefworld.app/).

This is a rare opportunity to join a dynamic organization as a leading figure of our React Native development and make a tangible impact on a product that changes how the world experiences food and drink. If your programming prowess is matched only by your enthusiasm for mobile innovation, we'd love to hear from you.

Tasks and Responsibilities

- Lead the development lifecycle of our React Native applications, from conception to deployment and beyond.
- Engage with cross-functional teams to define, design, and ship new features with a user-centric approach.
- Drive technical discussions, advocate for innovative solutions and architectures, and influence the direction of mobile development.
- Maintain and elevate code integrity, ensure application performance, and troubleshoot, debug, and upgrade software when necessary.
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency and improve user experience.

Qualifications and Requirements

- In-depth experience with React Native, having developed and maintained multiple high-quality applications across both iOS and Android platforms.
- Strong understanding of component-based architecture, including the creation of reusable UI components that adhere to modern design standards and best practices.
- Deep experience with state management solutions (such as Redux, MobX, or Context API) to ensure smooth and efficient app behavior.

- Proficiency in debugging and implementing testing frameworks to ensure application stability and reliability. Ability to write unit and integration tests that contribute to a robust CI/CD pipeline.
- A bachelor's degree in computer science, Computer Engineering, or a related field (or equivalent experience).
- Mastery of modern mobile development standards and best practices with a portfolio to showcase.
- Demonstrated contribution to React Native or other open-source projects is a significant plus.
- Proficient with code versioning tools, including Git, as well as familiarity with continuous integration.
- Familiarity with cloud services (preferably AWS) and backend services supports mobile platforms is desirable.
- Exceptional problem-solving acumen and critical thinking.
- Willingness to mentor and uplift the development team with your knowledge and expertise.
- Fluent Spanish and English speaker.

Competencies (in order of importance)

- Cross-Platform Development: Creation of cross-platform solutions that provide a seamless user experience across iOS and Android platforms. Experience with platform-specific APIs and understanding the nuances of each mobile environment.
- Performance Optimization: Diagnose and fix performance bottlenecks, implement best practices for code optimization, and improve the responsiveness and efficiency of mobile applications.
- Excellent communication skills with the ability to effectively convey technical concepts to both technical and non-technical team members.
- Ability to work collaboratively in a team environment and contribute positively to the development team´s success.
- Ability to adapt to changing priorities and handle multiple tasks simultaneously.

Lines of Communication

- This role will report directly to the CTO and collaborate closely with all members of the IT team.

Working Conditions

- Full-time dedication.
- Regular working hours.
- Ability to work remotely.
