

## JOB DESCRIPTION

### **Senior Full Stack Engineer**

#### **Introduction**

We are searching for an experienced and self-driven Senior Full Stack Engineer to join our IT Team. We have partnered with one of the most prestigious brands in the world in a new venture together: As a pre-seed food-tech company based in Madrid, we will operate worldwide, with a fast-growth mindset that is creating the best team possible!

Our vision is to create a new platform that brings taste lovers closer together, enables them to experience new ways of enjoying cooking and drinking, interacting with chefs, bartenders and sommeliers from every category, learning from them and accessing high quality content.

Our mission is to create the gold standard of content and transactional platforms for food and drinks lovers, that not only engages the consumers deeply into its content, but allows innovative ways of interaction between them, experts and producers.

We have five main values, which are the pillars of our venture: Trust, Integrity, Freedom, Curiosity and Passion. If you identify yourself with them, please keep reading!

Our BD will help us grow our business, work hand in hand with the marketing team to help drive top, critical, strategic sales initiatives, and sign partnerships and deals with sponsors and corporations.

#### **Brief description**

The position of Senior Full Stack Engineer will actively participate in the design, development and maintenance of the MasterChefWorld app (<https://www.masterchefworld.app/>) and all the back architecture that supports it.

The candidate we are looking for must be a passionate programmer, a person who literally loves software, who feels comfortable programming in any language.
